

EDUPOINT™ HET

100% Microsoft Solution

Power, and flexibility with an easily recognisable user interface

Integrated Education Management

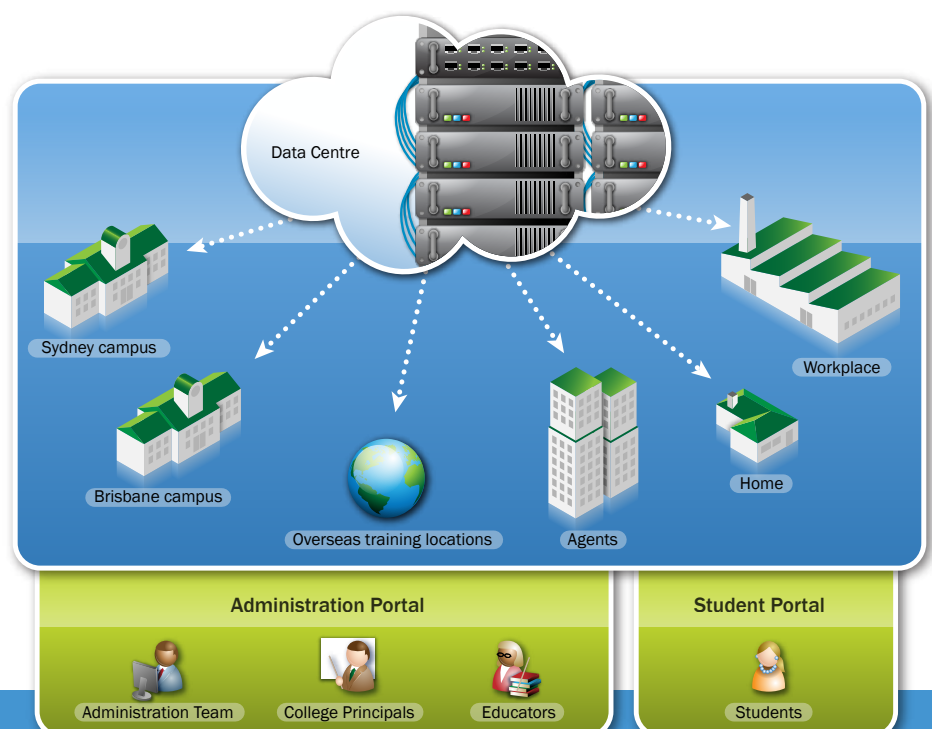

EduPoint is an integrated education management application powered by Microsoft software solutions and technologies. As a Microsoft based solution, EduPoint is completely aligned with the Microsoft for Learning Roadmap.

Built on the key requirements of flexibility and functionality, EduPoint brings together leading Microsoft solutions and technologies already successfully operating in the education sectors to deliver an integrated, ready to use solution.

The focus of all educational institutions should be learning, not administration. With so many internal and external stakeholders requiring detailed information, the education system is ever more demanding in terms of data management, security, compliance, reporting and timeliness.

EduPoint delivers an integrated solution that offers a flexible, Microsoft based architecture to meet the changing demands of your operations with deep functionality to ensure you can store data once and provide access for all stakeholders to the information they require. EduPoint will ensure you put the focus back on learning.

EduPoint offers an Education Framework that lets you manage your educational activities and business operations with one centralised application set and infrastructure. Data level security ensures all sensitive information has secure access and is kept in one database, in one central location: 'a single source of truth'.

EduPoint is built on the concept of 'information interaction'. With both internal and external stakeholders requiring access to a range of data, it's vital that information is kept secure, central and that it only needs to be entered once.

Feature	Benefits
100% Microsoft	<ul style="list-style-type: none"> • Common infrastructure already in place • Build on existing infrastructure investment • Trusted, industry-standard platform.
Familiar Interface	<ul style="list-style-type: none"> • Intuitive and familiar look and feel • Supports existing end-user tools (Microsoft XL, Microsoft Word etc).
Web –based deployment	<ul style="list-style-type: none"> • No additional infrastructure required • Easy to access anywhere, anytime • Supports student requirement for easy access • Supports staff requirement for 'mobile' learning and administration • Secure off-site information storage • No backup, technical administration requirement.
