

EDUPOINT™ HET

Technology and Hosting

100% Microsoft Foundation - cost effective to invest in and to maintain

100% Microsoft Technology

No more struggling with multiple spreadsheets and re-entering data into different systems- EduPoint has a single database for all information.

You only need to enter data once through our simple to use, web interface.

A 100% Microsoft foundation means you can use your familiar Microsoft Office tools and integrate EduPoint with your other business systems if needed. Designed with a focus on the roles people play throughout your organisation, EduPoint delivers an individualised, role-based user experience.

Whether you operate a single small RTO or an International college with campuses across the globe, EduPoint's flexible design will scale to meet your unique needs.

Live in the Cloud

Using EduPoint 'in the cloud' is just like accessing a commercial business website (for example - online banking).

You're provided with a secure internet connection to access your information. This data is securely stored and backed-up in our high security, highly redundant purpose-built data centre. We use 'virtual clustered technology' to ensure you data is backed-up, secure and available to you 24 x 7.

'Cloud users' receive all the benefits of the latest technology, without the financial outlay or the on-going maintenance or IT overhead. This offers the most flexible, scalable, efficient, and cost effective solution for organisations with less than 10,000 students.

In-House Deployment

Larger organisations may choose to host EduPoint in their own data centre.

Architected on 100% Microsoft technology, EduPoint builds on your existing Microsoft investment with familiar the MS SQL database and other industry-standard infrastructure. If you choose to host your own EduPoint solution, you can advantage of the skills and IT investment you already have in place.

If you want to expand the reach of EduPoint within your organisation, it's open architecture facilitates integration. Eclipse can assist you with integration to a range of Financial, business intelligence and reporting solutions.

Feature	Benefits
Cloud Option: Secure Data Centre	<ul style="list-style-type: none"> Data security - Disaster Recovery/Business Continuity – Data are always available, secured and backed-up Data centre is certified to the ISO 27001/ AS7799 security standard 99.5% availability Security against theft or natural disaster (e.g. fire or flood) Reduces power costs and consumption (no need to run air-conditioning or UPS) More environmentally friendly Increases physical office space (use your server room as an additional office, meeting room or store room) Reduces the cost of hardware, software and licensing – not to mention the cost of IT support staff Comply with industry regulations easily in terms of security, archiving and legal requirements Easier budgeting of monthly costs Operational Expenditure Vs Capital Expenditure
